Maximum Durability
in a Stylish Design

ITS Telecom access control solutions range from single door stand-alone solutions to fully-featured systems for controlling access to multiple facilities with complex requirements, ideal for various interfaces, businesses and residential applications.

Our wide array of products, range from Pancode unit with full dial pad, to our simplest one-button indoor Pantel unit. It offers various interfaces, as an extension of the PBX or direct connection to the PSTN line. One can select from weather-proof and vandal resistant models for outdoor installations that come in a sleek aluminum casing with heavy duty Piezo technology to a plastic case for indoor installations.

All our units are designed for wall mounting and are "Plug and Play", requiring only a simple connection. Once connected, the unit functions as an internal telephone extension, providing you control from any telephone extension in your office.

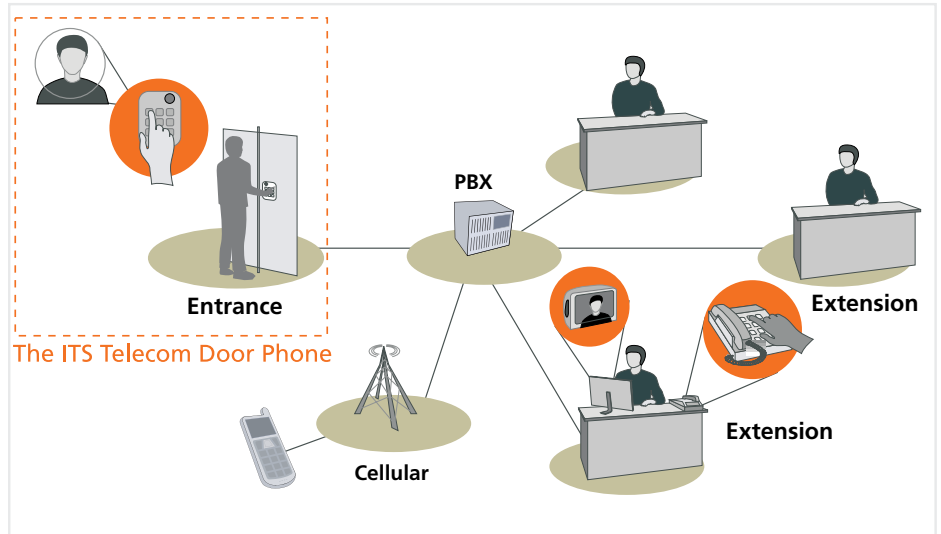

PBX Interface

Pancode / Pantel

- Universities with multiple campuses
- Residential homes & gated communities

Pancode

The Pancode systems provide full duplex telephone communication through hands-free operation and control door opening via touch-tone telephones.

The Pancode systems enable authorized visitors to enter a 4-digit access code to unlock the entrance door. A direct extension can be also dialed upon arrival. The door phones are suitable for indoor and outdoor use.

Pantel

The one-button models with a hotline function provide you with instant audio and / or video communication and building access control. This model is suitable if you want visitors to easily get in touch with a receptionist.
